EXPERIENCE

Founder / Full Stack Developer

November 2025 - Present

Vita

Remote

- Founded and led the development of a responsive, full-stack web application for unified life tracking (habits, goals, mood, calendar, insights), designing a modern UI optimized for both desktop and mobile users
- Designed structured task boards and information management systems backed by a secure relational data model, and integrated third-party services (Google Calendar, Plaid) for refined user data
- Implemented authentication, user management, and billing using Clerk, including protected routes, session persistence, and role-based feature access, supporting a growing user base
- Built interactive dashboards and analytics pipelines using charting libraries (Recharts/Chart.js), delivering actionable insights on data across the website

Frontend Developer

August 2025

Skinstric

Remote

- Built and shipped a fully responsive web app using Next.js, React, and TailwindCSS, delivering a clean, modern UI with smooth animations and fast load times across devices
- Integrated backend services with Axios for API calls, achieving a 100% success rate and sub-2s data retrieval time for enhanced user experience
- Developed an AI-powered feature that lets users upload or scan facial images and instantly receive personalized insights through an API
- Built an interactive data review interface allowing users to view, edit, and customize AI-generated information, improving usability and user control over results
- Optimized performance and scalability by refining component architecture, reducing re-renders, and streamlining API handling, resulting in noticeably faster interactions

Full-Stack Engineering Intern

June 2022 – August 2022

Fidelity Investments

Merrimack, NH

- Developed and deployed a personalized user preferences feature that dynamically displayed each user's most frequently used services, improving engagement and interface clarity
- Independently designed, implemented, and tested the project end-to-end using JavaScript, Node.js, and AWS (Lambda, S3, API Gateway, CI/CD)
- Collaborated with team leads to plan project structure, while serving as both lead developer and QA engineer
- Improved website efficiency and usability by 24%, validated through user testing and internal benchmarks

PROJECTS

Pomo | *Next.js, TypeScript, Supabase, TailwindCSS* | Link: <https://pomo.it.com>

- Built a full-stack productivity platform with a Pomodoro timer and Kanban task manager, featuring customizable focus/break sessions, real-time updates, and a drag-and-drop task board to help users plan tasks, focus in timed sessions, and track progress

OpenArena | *Next.js, TypeScript, Prisma, OpenRouter* | Link: <https://www.openarena.world>

- Developed a full-stack LLM evaluation platform that concurrently streams responses from multiple AI models, supports side-by-side voting, and tracks real-time performance metrics and leaderboards

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python, C, C++, C#

Frameworks/Libraries: React, Next.js, Tailwind CSS, Redux

Databases/ORMs: PostgreSQL, MySQL, MongoDB, Supabase, Prisma, Drizzle ORM

EDUCATION

University of Massachusetts: Lowell

Sep. 2020 – May 2024

Bachelor of Science in Computer Science, Minor in Mathematics
