EXPERIENCE

Founder / Software Engineer

November 2025 - Present

LycheeCorp

Remote

Vita — Life Management SaaS

- Founded and developed a responsive full-stack SaaS platform for unified life tracking across habits, goals, mood, calendar, and personal insights, with a modern interface optimized for desktop and mobile
- Built secure authentication, billing, relational data systems, analytics dashboards, and third-party integrations including Google Calendar and Plaid using Clerk, PostgreSQL, Recharts, and Chart.js

Noxa — iOS Screen Time Blocker App

- Designed and developed a native iOS application in Swift that helps users reduce excessive screen time through customizable app blocking, focus sessions, and multiple mechanisms that discourage bypassing restrictions
- Integrated Apple's Family Controls APIs with Supabase to build device-level app restrictions, authentication, subscription payments, real-time data synchronization, and persistent user activity tracking

Frontend Developer

August 2025

Skinstric

Remote

- Built and shipped a fully responsive web app using Next.js, React, and Tailwind CSS, delivering a clean, modern UI with smooth animations and fast load times across devices
- Integrated backend services with Axios for API calls, achieving a 100% success rate and sub-2s data retrieval time for enhanced user experience
- Developed an AI-powered feature that lets users upload or scan facial images and instantly receive personalized insights through an API
- Built an interactive interface for reviewing and customizing AI data, while optimizing component architecture and API handling to reduce re-renders and deliver faster, more responsive interactions

Full-Stack Engineering Intern

June 2022 – August 2022

Fidelity Investments

Merrimack, NH

- Developed and deployed a personalized user preferences feature that dynamically displayed each user's most frequently used services, improving engagement and interface clarity
- Independently designed, implemented, and tested the project end-to-end using JavaScript, Node.js, and AWS (Lambda, S3, API Gateway, CI/CD)
- Collaborated with team leads to plan project structure, while serving as both lead developer and QA engineer
- Improved website efficiency and usability by 24%, validated through user testing and internal benchmarks

PROJECTS

Pomo | Next.js, TypeScript, Supabase, Tailwind CSS | Live Website

- Built a full-stack productivity platform with a Pomodoro timer and Kanban task manager, featuring customizable focus/break sessions, real-time updates, and a drag-and-drop task board to help users plan tasks, focus in timed sessions, and track progress

OpenArena | Next.js, TypeScript, Prisma, OpenRouter | Live Website

- Developed a full-stack LLM evaluation platform that concurrently streams responses from multiple AI models, supports side-by-side voting, and tracks real-time performance metrics and leaderboards

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks/Libraries: React, Next.js, Tailwind CSS, Redux, TanStack Query

Frontend/Tools: REST APIs, GraphQL, Jest, Playwright, Storybook, Git, AWS, Docker, Kubernetes

EDUCATION

University of Massachusetts: Lowell

Sep. 2020 – May 2024

Bachelor of Science in Computer Science, Minor in Mathematics
